Portfolio

Technical Skills

Languages: Java, C++, JavaScript
Coursework : Data Structure, OOPS
Libraries: STL
Developer Tools: VS Code, IntelliJ

Education

Bhabha Engineering Research Institute Bhopal, MP

Chavara Vidhya Bhavan Hr. Sec. School Mandideep, MP
12th

Chavara Vidhya Bhavan Hr. Sec. School Mandideep, MP
10th

Projects

Farming Inventory Management System

- Overview: Built a backend inventory tracking system in Java to manage farm stock (e.g., crops, seeds, fertilizers) using Object-Oriented Programming.
- Technologies: Java.
- Key Features: Engineered a flexible, type-safe data architecture utilizing Java Generics (Inventory<T>) to allow dynamic handling of various asset types.
  Built core CRUD operations (Add, Search, Remove) with robust try-catch exception handling to handle stock updates smoothly.

Banking System Project

- Overview: Developed a console-based banking system that supports account creation, balance inquiries, deposits, withdrawals, and account closures.
- Technologies:. C++, STL (map), File I/O, Exception Handling
- Key Features: Persistent storage of account data. Exception handling for insufficient funds. Use of static members for unique account number management.

Yawn

- Overview: "Yawn" is a minimal blogging platform focused on simplicity and a clean writing experience.
- Technologies: HTML, CSS, JavaScript, GitHub
- Key Features: Lightweight and user-friendly interface, Basic post creation and management

Certifications

- Problem Solving Certificate - C++
  Link - CodeChef

Achievements

- Helped 50+ friends get a behind-the-scenes tour of a water treatment plant. Who knew sewage could be so educational?

Interests

Poetry, Exploring Car Technologies, Music composition
